Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35

U.S.C. 119(a)-(d). The certified copy has been received.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, “a height of the clinchers in a moving direction” and “a height of the clincher holder”, and in claim 3 “the height of the clincher holder” are indefinite in that such heights have not point of reference.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Olesen 5,004,142.

Olesen discloses a staple legs bending mechanism comprising a driver 23, a clincher holder (not shown numerically), a pair of clinchers 15a,15b, and a clincher actuating member

Art Unit: 3721

19,21 (claim 1), and a stopper that is formed on the clincher holder and comes into contact with the clincher actuating member 19 (claim 2).

With respect to claim 3, it is deemed that the clincher holder has a thickness of a table.

With respect to claim 4, Olesen discloses wherein the clincher actuating member includes a block-shaped member 19.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Olesen 5,004,142 in view of Eriksson.

Olesen discloses the invention including a clincher actuating member with a block-shaped member 19, but does not disclose a pair of cam members respectively provided for the pair of clinchers. Eriksson shows a stapler having a clincher mechanism comprising a pair of clinchers and a pair of cam members 7' respectively provided for the pair of clinchers for the purpose of independently pivoting each clincher. It would have been obvious to one having ordinary skill in the art to have substituted the pair of cam members of Eriksson for the clincher actuating mechanism of Olesen in order to independently pivot each clincher member.

Additional References Cited

The cited prior art is made of record but has not been relied upon in the rejection of claims. However, the prior art is considered pertinent to applicant's disclosure in that they show clinching mechanism for staplers.
